

Introducing the CliptagCloud Electronic Document Management Solution

CliptagCloud is a unique Electronic Document Management (EDM) solution that's built for the web and delivers deployment choice including Software-as-a-Service (SaaS) and On-Premise deployment. Using CliptagCloud, customers can enjoy the of very low overhead and minimal startup investment, easy access via a web browser and the security of a redundant, benefitsproof data center. There is no specialized hardware to manage and there is no up-front capital investment. Although disaster-designed using robust enterprise architecture, CliptagCloud is flexible and affordable to meet the needs of a small office or enterprise environments. Key benefits of the service include:

- Cost effective Electronic Document Management (EDM) Solution
- Cloud-based, high speed access from any browser device
- Leverage smart phones, tablets and laptops
- Elegant, intuitive design reduces learning curve
- Quickly streamlines document processes and reduces errors
- Minimize business risk associated with lost files
 - Files can be easily and securely shared with others

Features & Benefits

Capture Documents from virtually any Input Device in any Location

Centralized storage accessible from widely distributed locations. Embedded browser based high volume scanning. Simple drag and drop from the desktop to the web browser allows users to import any standard office and scanned documents into CliptagCloud Supports forms-based document import, ensuring critical business metadata is assigned to content using simple online templates.

Share & Collaborate

Collaborative Workspaces. The workspace feature enables collaboration on documents across any boundaries. Users can share their documents in a securely organized collaborative space.

Records Management. Provides the content framework to manage your retention and compliance needs.

Personal dashboards provide users with an overview of the actions, workflows and documents that are central to their current work.

Granular permission settings and Retention Policies that exceed compliance requirements.

Grant access to documents based on user permissions. Organize all enterprise information in a secure, central repository. Utilize Audit Trails to meet compliance requirements. Protect your data with secure encryption. Deliver a Single Sign On experience through Active Directory/LDAP integration.

Publish & Archive

Share documents that have been created and stored with a broader audience: Publish content from a workspace to intranets, extranets or external facing web sites. Delivers a flexible navigation capability that allows business users browse documents by the metadata dimensions most meaningful to your organization. Create virtual browsing views based on organizational chart (HR, Finance, Sales, and Marketing), region (Asia, Africa, North America) or any other category that helps describe your corporate content.

Search & Retrieve

Indexes document content and metadata. All access controls are respected, so that security rights are verified when search results are returned. Users can only locate the content they're supposed to see.

Search the content of your documents. Our advanced search features allow you to refine your query with the document metadata or the location within the document repository.

On-Premise Solution

As a complement to our Software-as-a-Service (SaaS) delivery model, cliptagcloud offers an robust On-Premise deployment for organizations that wish to install, manage and maintain their EDM installation behind their corporate firewall. CliptagCloud's On-Premise solution includes all the functionality of our SaaS solution. Consider CliptagCloud's On-Premise solution if your business:

- Requires that all company data reside behind your corporate firewall
- Must meet compliance guidelines governing company data management
- Has no internet access
- Requires user authentication integration with your existing security services such as Microsoft Active Directory/LDAP authentication services.

Document Scanning & Content Uploading

CliptagCloud through Cliptag Services (Pvt) Ltd offers document scanning services to clients requiring this service. Document scanning can be done on-site i.e. at the client site or off-site (at Cliptag Services' warehouse location). Uploading to the client's cliptagcloud environment is also done during the scanning process.

With CliptagCloud's integrated document scanning service it is possible to capture paper based content using any scanner and have it intelligently delivered to CliptagCloud's On-Premise or Cloud solutions – with the touch of a button! By partnering with CliptagCloud, you'll benefit from a single-vendor approach and customized solutions that accelerate your business processes, improve decision making organization-wide, and make compliance more achievable.

Document Scanning Rates

0-5,000 US\$0.10 per document	5,001-10,000 US\$0.08 per document	10,001-20,000 US\$0.07 per document	20,001-50,000 US\$0.05 per document	50,000+ US\$0.02 per document
---	--	---	---	---

On-site Scanning Surcharge. Please note that we charge an on-site printing surcharge of US\$300.00 per scanner per month.

Flexible Payment Options

As a service to our clients, we are pleased to offer a full range of payment plans to meet every financing need.

Plan	cliptagcloud Basic	cliptagcloud Plus	cliptagcloud Gold	cliptagcloud Enterprise
3 months	US\$95.00	US\$280.00	US\$560.00	US\$1,410.00
